THE FUTURE WILL BE SHAPED BY INFINITE CAPACITY TO CONNECT PEOPLE, BUSINESSES, AND INFORMATION.

As more users exchange larger amounts of data, more devices connect and 5G and IoT transform our networks, as only solutions proven to deliver on increasingly complex requirements will ensure access to a new world of data at lightning speed.

MOX is a leading fiber optic network specialist. We build the capacity to deliver on the infinite possibilities for new paths, connections, and performance.

MOX responds to the increasingly complex requirements of hyperscalers, wireless service providers, government, municipalities, and public and private partnerships, with exclusive, custom design and deployment of unmatched low latency networks.

**INFINITE CAPACITY**

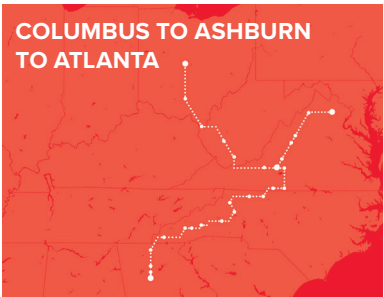

Propelling business growth and transformation with leading fiber assets and performance.

**CUSTOMER COUNSEL**

Providing advice with agility, speed and efficiency to power our customers' objectives.

**CUSTOMIZATION**

Powering purpose-built infrastructure, network opportunities and relationships.

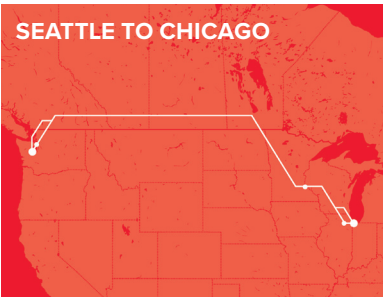

A three-way junction point available for dark fiber connectivity between Columbus, OH, Ashburn, VA and Atlanta, GA.

Product
Dark Fiber

High capacity lit fiber available along the most highly connected corridor in North America.

Products
Lit Fiber – 10G and 100G
Dark Fiber Channel – 50 GHz Channels

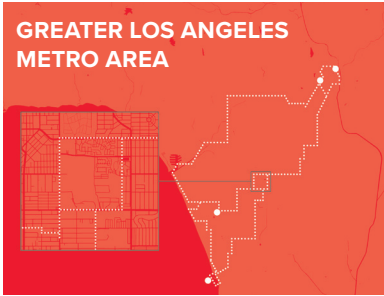

Direct and diverse fiber path available from Seattle to Chicago, with access to the PC-1 CLS and CME Aurora.

Products
Lit Fiber – 10G and 100G
Dark Fiber Channel – 50 GHz Channels

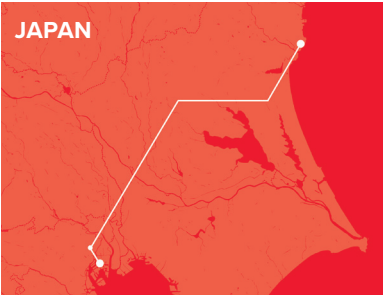

New and diverse route between cable landing stations and data centers to serve new international and Pacific customers.

Product
Dark Fiber

New fiber routes available in the Greater Los Angeles metro area.

Product
Dark Fiber

Direct access from Tokyo to Ajigaura CLS, and back to the U.S. through Seattle, WA and the remainder of the MOX network.

Products
Lit Fiber – 10G and 100G
Dark Fiber Channel – 50 GHz Channels

HOW DO YOU BUILD INFINITE CAPACITY FOR THE FUTURE?

WHAT WE DO.

Together, we envision the infinite possibilities of your network. Offering the latest technology, zero legacy, and highly customized network capabilities, our solutions are designed to power your business growth and performance.

NETWORK SERVICES

From strategy to design and architecture, installation, and operations, tap into our expertise across all aspects of the network.

CONSULTING SERVICES

Our experts partner with you for the design and procurement of optimal capacity.

RFP DEVELOPMENT

Leverage the most streamlined and effective RFP development, coordination, and execution to produce exceptional results.

WHAT WE OFFER.

We offer a full range of lit, dark fiber, and dark fiber channels, from design to delivery.

LIT FIBER

Benefit from secure, scalable, high-capacity bandwidth powered by exclusive routes with unmatched low latency across North America and Asia.

DARK FIBER

Leverage highly diverse routes, unparalleled performance, and access to colocation. You manage and control your network while enhancing business performance through our leading fiber network routes.

DARK FIBER CHANNELS

Increase capacity without needing to purchase additional services. Self managed or fully managed, scale and control your upgrades.

WHO WE WORK WITH.

**ENTERPRISE**

Enterprises face infinite demand for performance, growth and adaptation.
MOX works with companies from all industries, from healthcare to financial markets, and understands the unique perspective each has on network requirements. Leverage our exclusive routes, industry-leading customer service, and world-class expertise in strategic network design, deployment and operations to deliver on enterprise performance needs.

**CONTENT PROVIDERS**

Content providers must manage infinite data growth.
As a leading fiber optic network specialist, we enable content providers to respond to massive growth in digital content delivery with fiber infrastructure built to meet large-scale, high-bandwidth, low latency requirements. Achieve your data growth requirements with exclusive, custom design and deployment of unmatched networks.

**CABLE COMPANIES**

Cable companies are tasked with growing demands on performance.
With customer expectations for seamless media delivery, we help you drive security, capacity and performance in your network. We offer exclusive, custom design with leading capabilities for connecting remote metro networks headends enabling higher speeds for subscribers, unique routes providing diversity between Internet hubs, and new fiber and routes to sustain speed requirements from your customer base driven by 5G and IoT.

**LIFE SCIENCES**

How do you deliver infinite capacity for revolutionary life sciences?
MOX was built on the foundation of growing revolutions in life sciences. Our high capacity infrastructure and exclusive fiber routes were forged from the specific domain expertise required to optimize and accelerate the transmission of bandwidth intensive imaging, devices and electronic medical records between hospitals, doctors, and research institutions.

**MUNICIPALITIES**

Municipalities are focused on balancing infinite possibilities for community growth.
MOX is empowered to deliver on your community's fiber network needs with infrastructure that will scale to rapidly growing demands for higher efficiency, connectivity and safety, while managing the needs of multiple stakeholders and constituents. MOX has deep expertise working with municipalities to deliver projects in a timely and cost-effective way.

**GOVERNMENT**

Federal agencies must optimize dedicated connectivity to fulfill their core mission.
Whether for a civilian mission, supporting the EIS contract, or for supporting the War Fighter, MOX's powerful past performance in building Dark Fiber Networks has provided expertise in building dedicated connections for some of the largest companies in the world. We bring that expertise to the federal arena to deliver fiber network capabilities on time and under budget.
